

Press Release

Future-oriented solutions for residential and commercial construction

heroal presents new products at Batimat 2019 in Paris

Verl, September 2019. As a provider of comprehensive systems, heroal presents newly developed aluminium system solutions for tomorrow's building envelope at the Batimat 2019, following the motto „SIMPLY BETTER. FUTURE.“. The main focus is on the topic of Outdoor Living as well as on solutions characterised by their versatile fields of application in both residential and commercial construction.

Outdoor Living

One of the new products presented by heroal at the fair is a system solution for the segment Outdoor Living, which, thanks to the unlimited open panoramic views it provides, is perfectly suited for private residential buildings and commercial projects. The patio roof system is offered as a comprehensive system with numerous options for the integration of versatile additional components.

Sliding door system with optimised production process

A new sliding system is another highlight at the fair. It has been optimised regarding face widths, energy efficiency and production processes, and offers the opportunity of creating more transparency in residential and commercial construction.

Perfectly tuned

At Batimat, heroal also presents some new solutions in the fields of roller shutters and sun protection. A special focus is placed on the perfect harmonisation and compatibility of heroal systems for windows, doors and curtain walls with roller shutter, sun protection and roller door systems by heroal. With the heroal VS C product range, the company presents an efficient system variant of the textile sun protection system heroal VS Z. In addition, heroal shows a new guide rail which makes minimalistic face widths possible.

Just like the existing heroal system portfolio, all of the new products on display can be individually designed thanks to the especially durable and weather-resistant heroal

surface coating technology. In addition to all of the colours of the RAL chart, the exclusive colours of the Les Couleurs® Le Corbusier range as well as the surface refinement heroal SD for designs like classy wood or modern concrete looks are available. That way, the entire building envelope appears harmonious - design from one source.

Project service

Unique projects ask for tailor-made solutions. In France as well, heroal project services support architects, planners and fabricators in all stages of a building project and provide consulting where architectural visions come true through professional, efficient solutions.

We are looking forward to meeting you at our exhibition stand M033 in hall 5A at Batimat and are pleased to present our high-quality product innovations to you.

heroal – the aluminium systems supplier

As a leading supplier of aluminium systems, heroal develops and produces perfectly coordinated systems for windows, doors, facades, roller shutters, roller doors and sun protection. Folding and sliding shutters, insect protection, terrace roofs and carports round off the product range. By minimising energy consumption during production, maximising energy conservation during usage as well as ensuring optimum profitability during system manufacturing and an increase in the value of the building, heroal system solutions make a significant contribution to sustainable construction.

Innovation, service, design, sustainability

The heroal brand represents system solutions that unite practical innovations, industry-leading service and high-quality design that can be sustainably integrated into any architecture.

Over 800 employees across the company work continually to further develop the systems and optimise the quality of heroal's service and performance.

The heroal brand stands for premium quality made in Germany – certified according to ISO EN 9001. heroal products and systems are exclusively produced in heroal production facilities in Germany - at our company site in Verl as well as in Hövelhof - and have been distributed in France for more than 40 years.
